

CONCEPT

A quiet architecture monograph. Warm stone paper, black typography and a Swiss grid give the work the neutrality of a museum catalogue, so the renders are read as architecture rather than advertising. Images sit inside the margins like plates in a book, always at native proportion. Large serif titles give the voice; small sans-serif data tables carry the facts. Bronze appears only as a hairline or a single word, a few times in the whole book.

IMAGE TREATMENT

Scale	Plates at 172 mm (≈ 265 ppi) or 84 mm two-up (≈ 400 ppi). No bleeds in this concept.
Crops	None. Native 16 : 9 proportion, framed by paper.
Captions	Numbered “Fig.” captions taken from the website alt text.

IDEA
No image at all. The name is set like a monograph title, low on the page, with the paper doing the work.

PRINT
Ideal on an uncoated ivory board (e.g. 350 g) with the name blind-debossed or foil-free; also works digitally printed.

DETAIL
The only colour is a 14 mm bronze hairline above the name.

Portrait Alaa Masri, Riyadh

I'm Alaa Masri, a Lebanese interior designer and interior architect based in Riyadh. Over 15 years of practice across the Gulf and Lebanon have shaped my approach to space.

I work from the first concept through to final handover, connecting design, materials and craftsmanship with the precision that execution demands.

My work spans luxury residential, hospitality, commercial and retail interiors — coordinating clients, consultants, contractors, workshops, factories and site teams so that the design holds from drawing to site.

CONCEPT

The website, translated into print. Pages are a deep olive-black, and the renders run edge to edge as wide cinematic bands, so the light in each image becomes the main event. Typography is oversized, warm ivory, with bronze kept for numerals and captions. Each band keeps its native 16 : 9 proportion; the dark page frames it like a screen. Luxurious through restraint: no gradients, no gold foil, no ornament.

GRID & MARGINS

IMAGE TREATMENT & PRINT NOTES

Scale	Full-bleed bands at 210 mm ≈ 218 ppi (acceptable for renders; 300 ppi with originals).
Crops	None — the band is the image's own 16 : 9 frame.
Print	Heavy ink coverage: needs coated silk stock and a matt laminate on the cover. Text reversed out never below 7 pt.

IDEA

One render, full bleed, as a cinematic band. The name sits above it at display scale, like a film title.

CONCEPT

An interiors-magazine reading of the work. Light paper, very large serif type, and asymmetric compositions that play one image against a warm sand block — the only “object” in the system besides the renders. Images bleed off one edge, never both, and titles break across lines in roman and italic, so every page has a direction. Page furniture shrinks to a folio number. Expressive in rhythm, but never decorative: no textures, no ornaments, no tilted images.

GRID & MARGINS

Trim	A4 · 210 × 297 mm, 3 mm bleed
Columns	8 × 18 mm, 4 mm gutter
Inner margin	24 mm — wide, so nothing is lost in the binding

Ink 2 #57534C · K75 Body text	Muted #9A948A · K45 Placeholders	Bronze #97764F · C28 M42 Y65 K12 Reserved — practically unused

IMAGE TREATMENT

Scale	150–190 mm bleeding off the outer edge (≈ 240–300 ppi); details at 70–90 mm.
Crops	Controlled: square crops only where resolution allows (≥ 280 ppi), stated on each board.
Overlap	Images overlap the sand block — never other images, never text.

IDEA

The name splits around one image: “Alaa” in italic above, “Masri” in roman below, on a diagonal. The sand block anchors the composition.

IMAGE

burgundy-salon-01 at 155 mm, bleeding off the right edge (≈ 295 ppi), uncropped.

FINISH

Soft-touch matt laminate on a bright white board.
